

# IQVIA DeltaPA

## The premium tool for monitoring Canadian prescription drug prices

The current state of drug pricing practices in Canada necessitates timely on-demand access to market price adjustments.

IQVIA DeltaPA (**Delta Price Advisor**) brings Canadian prescription drug prices to your fingertips to help you monitor competitor price adjustments, detect, and observe trends in provincial and wholesale prices, and plan pricing strategies prior to the launch of your company's product.

### THE IDEAL RESEARCH AND PLANNING TOOL

With DeltaPA, you can easily monitor Canadian prescription drug prices to quickly detect trends or plan pricing strategies for your product launch.

#### BENEFITS

- Simplified price comparisons
- Current and historical wholesale and formulary drug prices to conveniently conduct price comparisons across Canadian price sources
- On-demand access to wholesale and formulary prices for most provinces, and AQPP list prices in Quebec

#### FEATURES

- All Canadian provinces and territories
- Current list price, price effective date, end date, % change
- Updated weekly
- History from Jan 2001 forward
- Available on an on-line dashboard
- Extracts are downloadable as excel or CSV
