

Real World Solutions Database Studies

June 2020

Selected Purchasing and Reimbursement Actions Globally

Canada loosens restrictions on resubmissions for oncology reimbursement review

BeNeLuxA is formed to address sustainable access to medicines

Nordic countries further explore joint value assessments and look toward joint purchasing

U.S. commercial insurers increase use of 'accumulator' adjustment plan designs to discourage induced demand from patient use of coupons

NICE absorbs CDF, clarifies assessment approach

Manufacturers and commercial insurers are exploring outcomes-based contracts to determine discounted reimbursement levels for oncology drugs

ICER begins assessments of CAR-T and gene therapies for cancer, framing cost in context with disruptive benefits and few valid comparators

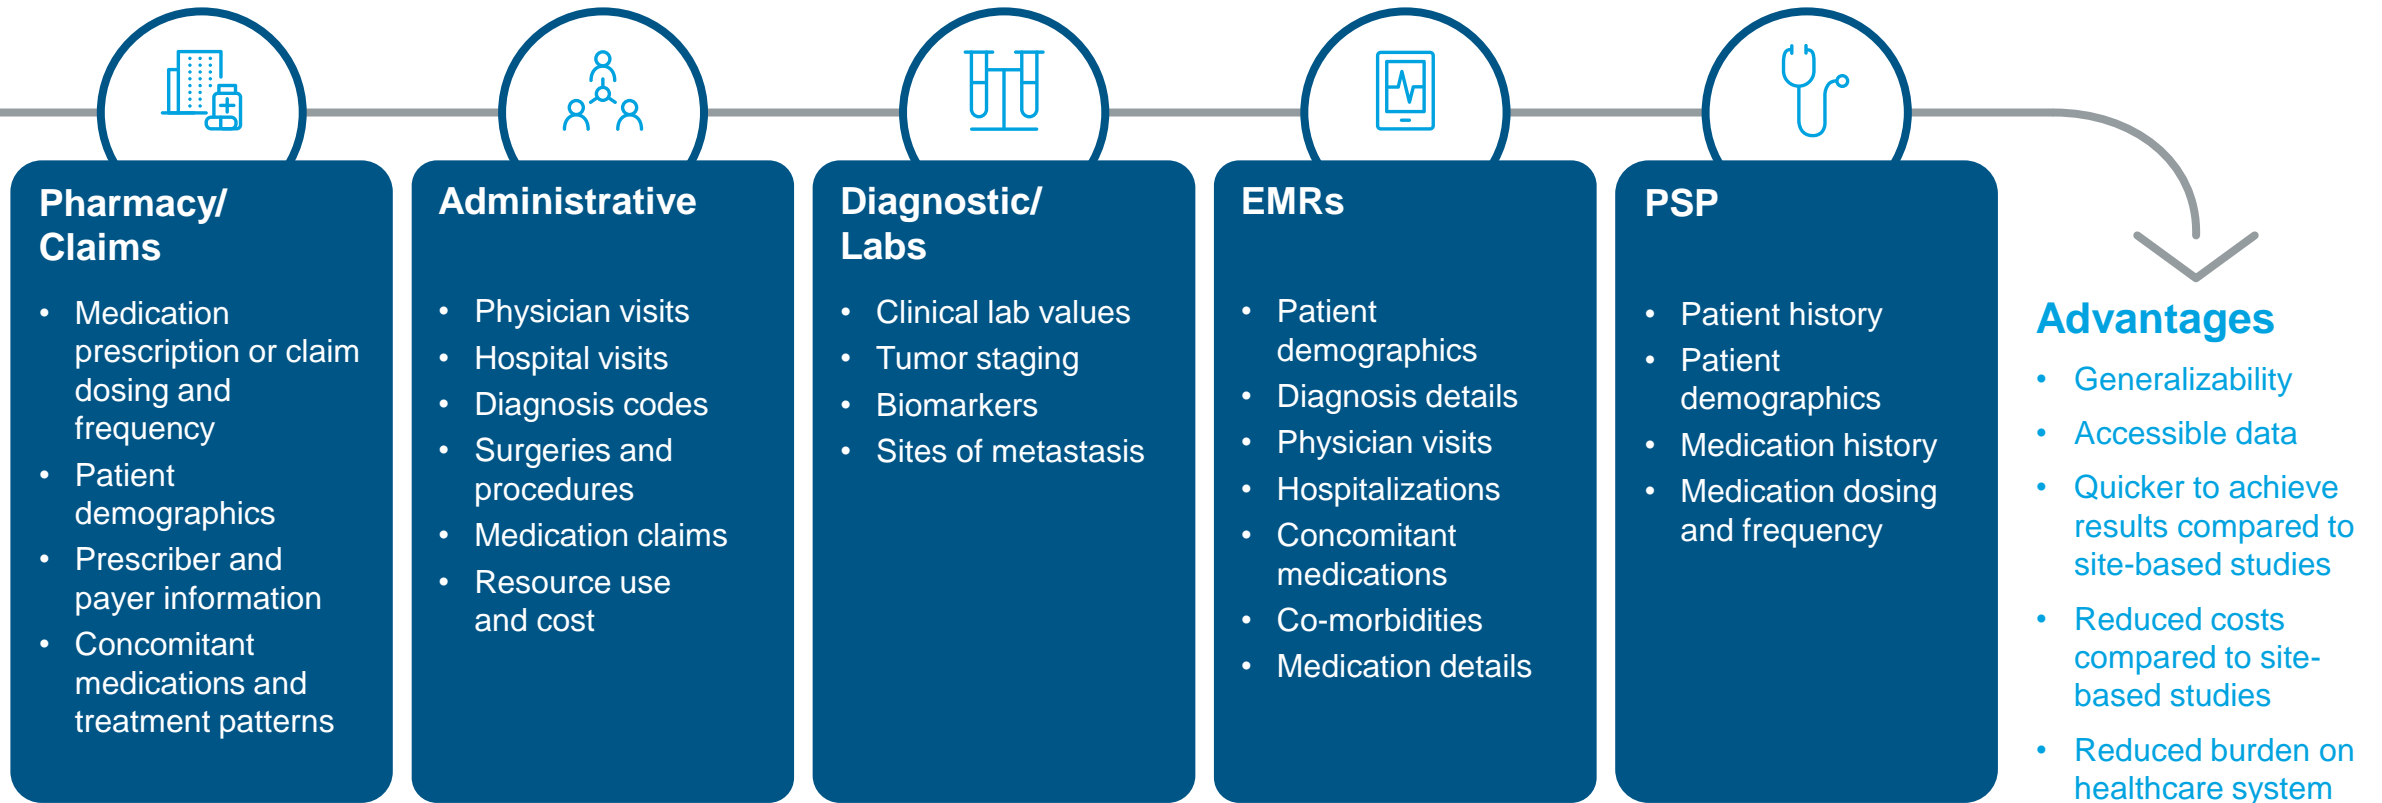

Do you need to generate Real World Evidence fast and cost effectively?

Think database studies!

Secondary Data First

A variety of database exist in Canada which can be leveraged for Real World Evidence

The IQVIA Real World Solutions team can support a variety of different study types

External comparator

RWE in regulatory Trails

- Network meta analysis
- Real world benchmarks
- Real world comparators

Epidemiology

Monitoring the natural history of disease

- Burden of illness
- Disease progression and treatment pathways
- Determine standard of care
- Characterize patient populations

Drug utilization

Real world medication use

- Drug utilization
- Persistence, adherence and retention studies
- Indication analysis

Effectiveness and safety

Real world safety clinical benefit: risk

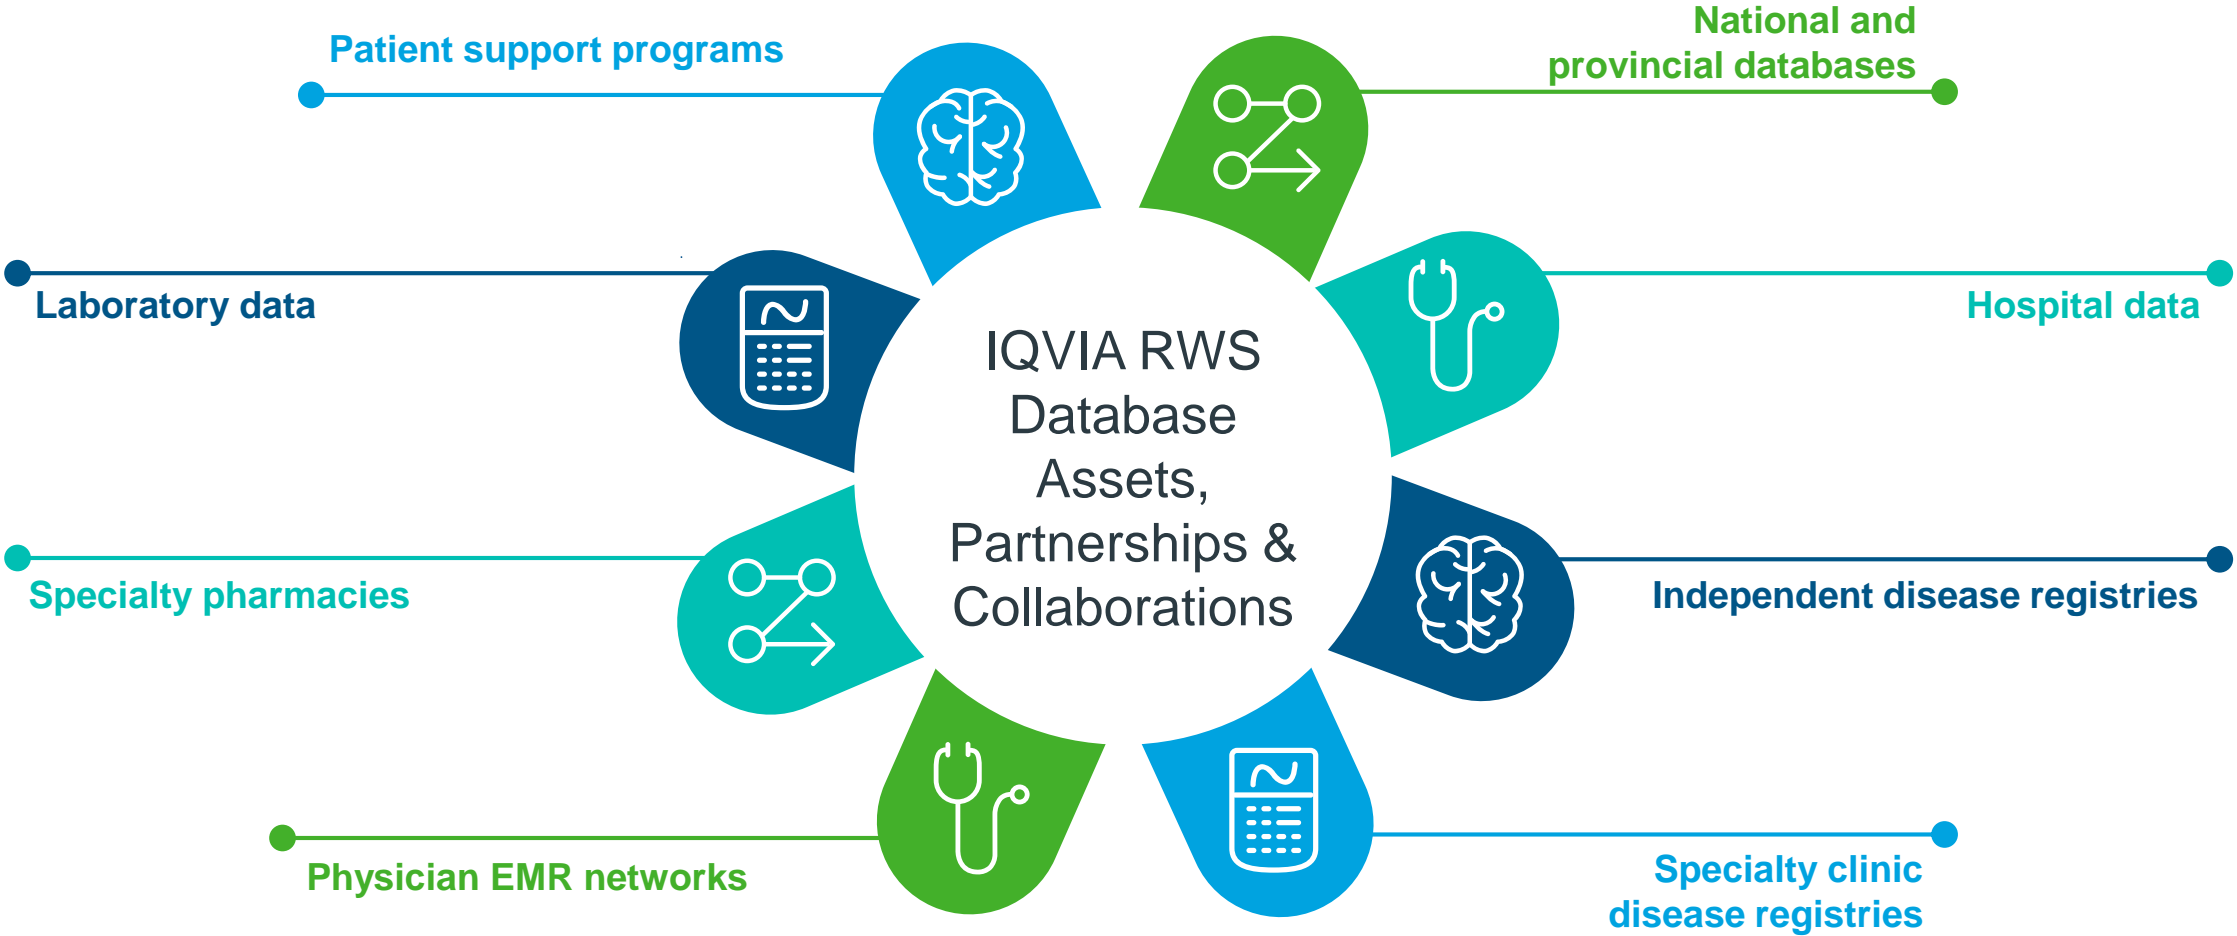

- Safety surveillance
- Post authorization safety study
- Real world effectiveness
- Patient populations or subgroup analysis
- Comorbidities

Health care resource

Cost and resource use to inform reimbursement

- Burden of disease
- Budget impact
- Comparative effectiveness

At IQVIA we can leverage a variety of databases to develop our Real World Solutions

We would be happy to set up a virtual meeting to discuss our full range of capabilities
