

Using Electronic Medical Records to Generate Real World Evidence

June 2020

Are you looking for an efficient method of generating clinically rich Real World Evidence?

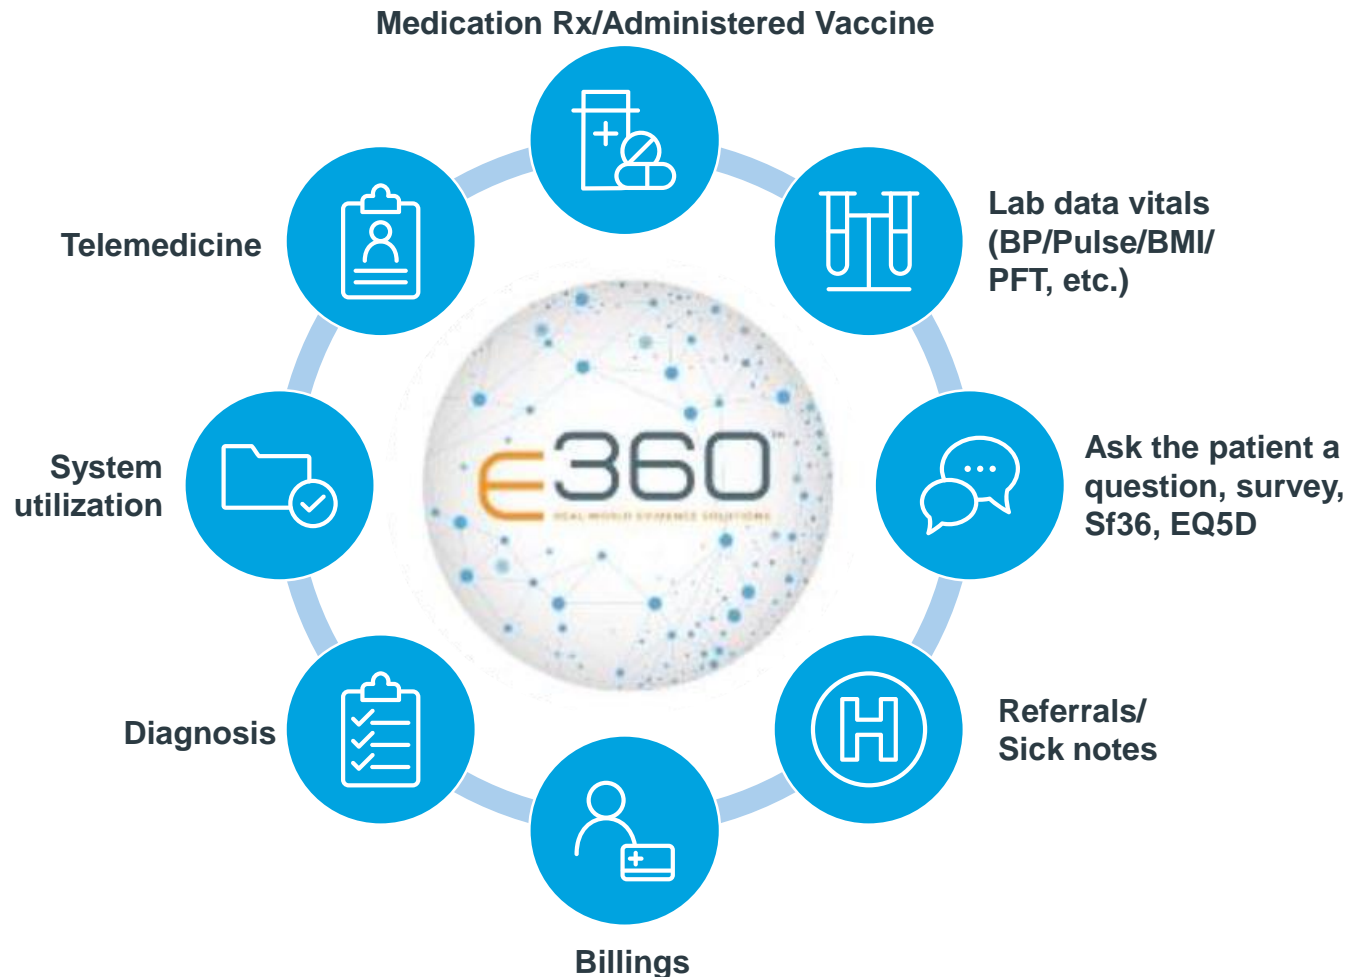

EMR data

Evidence networks

IQVIA has access to a clinical rich EMR database that can be used for RWE generation

Database considerations

- ✓ Predominately Ontario primary care
- ✓ >1.2 million patients, fully anatomized data
- ✓ Electronically captured structured data
- ✓ Lab values

Scope of use

- ✓ Medical and scientific publications
- ✓ HTA submissions
- ✓ Impact tracking for public health initiatives
- ✓ Support point of care initiatives for MD decision making

IQVIA has access to a clinical rich EMR database that can be used for RWE generation

Evidence Network

Proven ability to generate RWE by electronic extraction and consolidation of patient level data

Consolidate information from 2+ clinics or existing registries

Technology and process to scale the network

Single or multi-sponsor studies

We would be happy to set up a virtual meeting to discuss our full range of capabilities
