

# Cenduit Interactive Response Technology

*Run faster, higher quality patient-centric studies*

Accelerate study start-up and amendments, simplify site and sponsor experience, reduce trial supply costs and improve study decision making while ensuring quality standards and patient safety during your trial with Cenduit Interactive Response Technology. Built on a robust, scalable platform, our patient-centric approach to technology delivery provides exceptional value and peace of mind for sponsors and their patients in clinical trials. Cenduit IRT is part of the Digital Patient Suite of IQVIA Technologies Orchestrated Clinical Trials (OCT), **an end-to-end, patient-centric platform that provides an unparalleled data infrastructure, seamless connectivity and intuitive design to drive smarter, faster trials.**

## YOUR CHALLENGES

Complex and lengthy site/provider workflows and interactions across multiple eClinical systems

Randomization tools that don't support complex or adaptive schemas or integrate across platforms

Site stock-outs or IP waste due to fluctuating or unpredictable enrollment or study changes

Struggles in optimizing supply management and gaining transparency

Time-consuming and costly protocol amendment and change management process

## YOUR SOLUTION

Cenduit IRT provides randomization and trial supply management support for simple to complex trials that:

- Accelerates study start-up and protocol amendments with flexible, adaptable systems and self-service capabilities
- Simplifies site and investigator experience with streamlined workflows and reduced data entry
- Reduces supply costs through data driven insights, automation and expertise
- Improves decision making with access to real-time data and the right tools to monitor your trials
- Enhances insights and reduces administrative burden with 400+ turn-key eClinical integrations

Improves site experience and supports patient outcomes

Rapid delivery of studies and protocol amendment

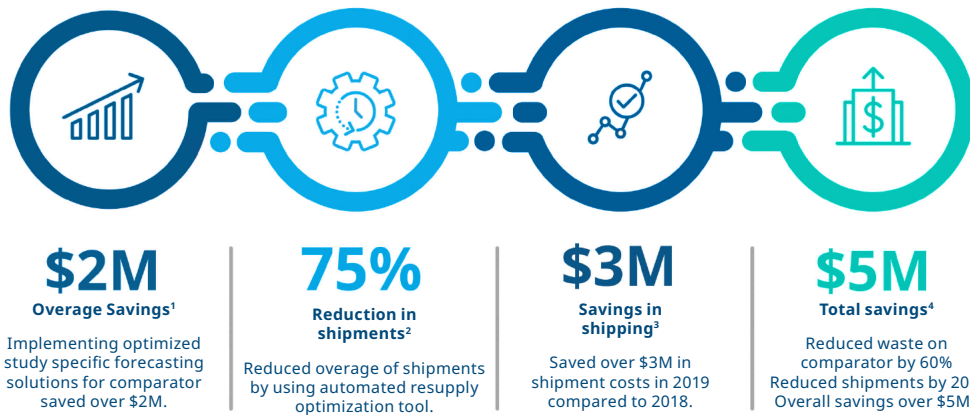

Intelligent supply optimization and flexible across platforms

Accelerates standard, decentralized, hybrid or virtual trials

## Delivering the right drug to the right patient at the right time has never been as easy or efficient

1. IQVIA internal, overall study savings for comparator 2. IQVIA internal, YOY reduction in shipments for large, multinational trial 3. IQVIA internal, YOY shipment cost savings for large, multinational trial 4. IQVIA internal, total combined sponsor savings on 2 large phase 3 trials

### Cenduit IRT supports patients, sites and sponsors throughout the clinical study

#### For Patients

- Ensures the right drug gets to the right patient at the right time
- Technology speeds drug dispensation and reconciliation on-site and remotely
- Electronic drug accountability assists monitoring of patient compliance

#### For Sites

- Single sign-on with user-friendly interface and shared view for data and reporting with IQVIA patient solutions
- Integrated and shared workflows help sites perform faster transactions, leaving more time for patients
