

IQVIA Integrated Global Compliance Solutions

Integrated. Connected. Complete.

The situation and impact

Life sciences companies are changing the way they stay compliant. A proliferation of regulations, products, markets and data sources—combined

with intense cost pressures—require innovation and interconnectedness to overcome complexity and support the needs of the business.

53%

of global life sciences CEOs consider industry regulations to be a top disruptive business trend

2000+

new regulations issued by the FDA alone since 1998

20%+

annual increase in reported events

Comprehensive, integrated global compliance capabilities

HEIGHTEN PERFORMANCE AND EFFICIENCIES. INCREASE VALUE.

IQVIA offers a complete approach that brings together safety, regulatory, quality, and medical information to transform how life sciences companies sustain compliance and how compliance functions perform better together.

- Fully integrated technology platforms
- Increase efficiency and reduce costs
- Advanced analytics leading to deep insights
- Improve compliance performance
- Achieve global portfolio visibility
- Unparalleled data

Lower your burden. Boost operational compliance.

Simplify, automate and integrate your compliance response times, accuracy, predictive planning and efficiency. Employ IQVIA's innovative technologies, decades of life sciences experience and advanced analytics—including artificial intelligence (AI) and machine learning (ML)—to glean key insights and make better decisions. Focus more resources on higher value activities.
