

IQVIA Enterprise Feasibility

Quickly determine research data appropriateness with our powerful self-managed clinically feasibility solution

Do you want to answer crucial feasibility questions faster? Do you want to access global, comprehensive data sets to quickly determine research appropriateness? Easily analyze your product’s viability, identify challenges, and optimize strategies with **IQVIA’s Enterprise Feasibility** data query and visualization tools.

IQVIA’s Enterprise Feasibility offering consists of a collection of interconnected yet independent applications, that can support every step of your journey to insight, from raw data to hosted dashboard.

Enterprise Feasibility Applications — In focus

Access the largest proprietary Real World Data collection or bring your own

With Enterprise Feasibility, you can ask unlimited feasibility questions across multiple datasets. Rapidly access, analyze, visualize, and collaborate on insights from over one billion global patient records to get rapid answers at low cost.

With over 20 datasets, preloaded, instant provisioning of the most valuable datasets is readily available. Flexible and configurable, additional longitudinal datasets can be ingested rapidly.

Leverage IQVIA datasets or easily provision your own

Schema agnostic for rapid integration	Types of Data EMR Longitudinal Prescription Adjudicated Claims Hospital EMR Hospital Claims Open-Source Claims
Patients 1+ Billion	
Events 76 Billion	Schemas OMOP Pharmetrics Plus Ambulatory EMR US Oncology LRx Dx Disease Analyzer IQVIA Claims (Japan) IMRD THIN
Locations 8 Countries	

Easily assess whether your research is viable via our extensive data network and powerful tools

Managed data provisioning and refreshes

Get access to refreshed data fast

Powerful query and applications

Identify your required populations in less time

Always-on, analysis on-demand

Direct and immediate access and analysis

Improved collaboration

Enhanced team collaboration through asset sharing, intuitive query workflows and report distribution

Takeaways

- Quickly determine research data appropriateness through IQVIA's intuitive query and visualization tools
- Conduct unlimited studies across datasets for rapid answers, fast output, and easy distribution at low cost
- Analyze product viability, identify challenges, and optimize analysis strategies
- Access over one billion global real-world patient records
- Rapidly integrate your own data if required

Enterprise Feasibility belongs to a suite of tailored self-service offerings including Health Data Access and Cohort Analytics

Cohort Analytics

Data Science - Made Simple

Accelerate insights into patient characteristics and trends through innovative scientific method driven analytics.
