

IQVIA Health Data Access

Supporting integrated health data export and analysis with easy-to-use self-managed applications

Do you want to access diverse, global, comprehensive data sets? Do you want to improve workflow efficiency with access to innovative and sophisticated analysis tools? Do you want to seamlessly integrate your workflows, with the ability to export and share data across multiple file types? **IQVIA Health Data Access can help.**

Fast-track, unlock, and integrate your analysis through innovative, self-managed applications and seamless data sharing.

Consisting of a collection of interconnected yet independent applications, Health Data Access supports every step of the journey, from data to insights.

With our Health Data Access self-service offering, you can instantly access IQVIA's unrivaled collection of global health data alongside your own, revolutionizing the way your teams analyze and generate insights. This cost-effective solution enables you and your organization to quickly provision data, leverage powerful tools for analysis, and share results.

 <p>Health Data Catalog Searchable catalog of research medical Health Databases</p>	 <p>Workspaces Organize, store and share work across your organisation or group</p>	 <p>Codelist Manager Create Codelists for use across applications, supports dozens of medical terminologies</p>
 <p>Cohort Builder Build and test protocols on large patient population in real time</p>	 <p>Feature Extractor Concise, bespoke data extracts for analyses across user-defined covariates, demographic variables, and time criteria</p>	 <p>Analytics Workbench Scientific Methods Library supporting complex analysis across Real World Data</p>
 <p>Dashboard Studio Create custom dashboard views for your analytics</p>		 <p>Health Data Sharing Export and Share Cohort Data Slices via Snowflake</p>

Augment your analytical pipelines and streamline your data access requirements

 <p>Managed data provisioning and refreshes Get access to refreshed data fast</p>	
 <p>Powerful query and extraction applications Identify your required populations in less time</p>	
 <p>Seamless Snowflake™ data sharing Gain immediate access and connectivity</p>	
 <p>Integrate with existing processes Enhance and extend your existing process via improved workflows and multiple data sources</p>	

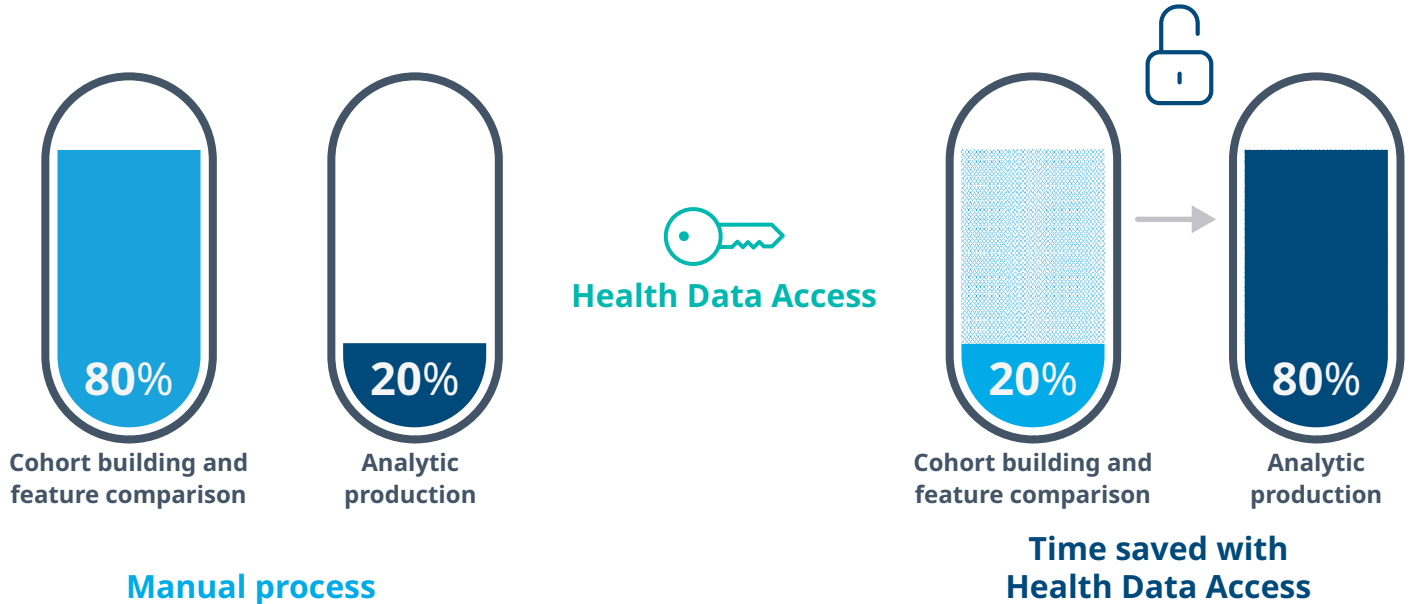

Access the largest proprietary Real World Data collection *or bring your own*

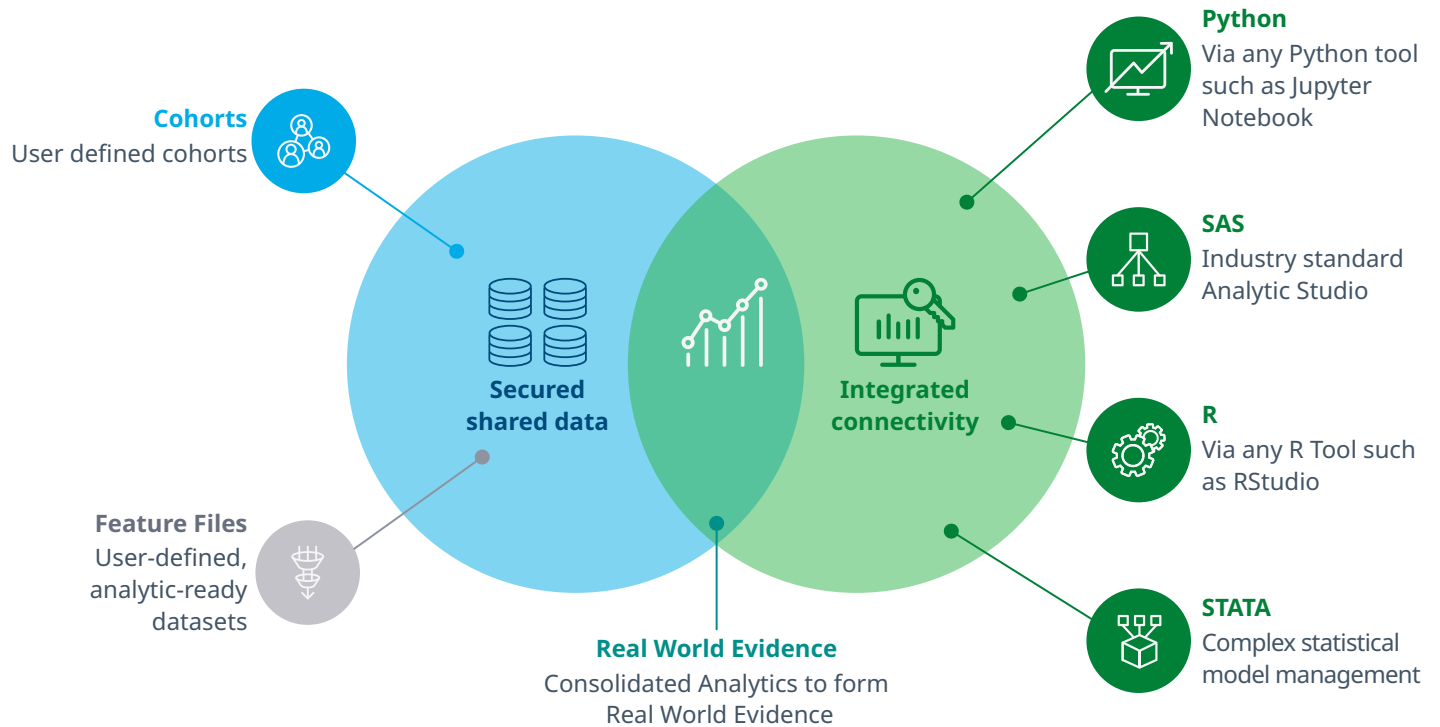

Leverage IQVIA datasets or easily provision your own

Schema agnostic for rapid integration	Types of Data EMR Longitudinal Prescription Adjudicated Claims Hospital EMR Hospital Claims Open-Source Claims

Health Data Access — unlock time for analytics and insights

With Health Data access, you can securely export and share data

Takeaways

- Seamlessly integrate your workflows with multiple data delivery options (Snowflake, AWS S3, etc.)
- Conduct unlimited studies across datasets for rapid answers, fast output, and easy distribution at low cost
- Perform feature engineering and deliver direct to your analytical workflows
- Improve workflow efficiency, promote collaboration, and empower your teams with centralized access to even the largest IQVIA data sources
- Eliminate barriers to collaboration by allowing a single point of truth
- Get access to only the data you need when you need it
- Flexible deployment options including SaaS, federation, or PaaS

Health Data Access belongs to a suite of other tailored self-service offerings

Enterprise Feasibility

Powerful Data Feasibility

Quickly determine study data appropriateness through IQVIA's intuitive query and visualization tools.
