

# IQVIA HealthCare Authenticator Software Development Kit

Our open-source, white label software development kit (SDK) enables provider-facing mobile apps and web portals to seamlessly activate and maintain healthcare provider (HCP) single sign-on, authentication and identity verification. These capabilities are enabled through integration with one of the world's largest and most accurate sources of HCP data.

## Simplify user sign-on, authentication and identity verification for your mobile apps and web portals

The IQVIA HealthCare Authenticator SDK is a set of pre-built application components and screens connected to data.

### WITH THE IQVIA HEALTHCARE AUTHENTICATOR SDK YOU CAN EASILY:

- Implement a trusted single sign-on (SSO) system that millions of HCPs already use.
- Authenticate your users without reliance on cookies and confidently secure access to HCP-only content.
- Get real-time verification of user identities via algorithms powered by OneKey, a global database of 24M HCPs with daily updates.
- Get the identity of users verified via comprehensive checks conducted by a team of research associates.
- Understand more details about your users to inform your content and targeting strategies.

### IMPLEMENTATION OPTIONS INCLUDE:

		SINGLE SIGN-ON	USER AUTHENTICATION	IDENTITY VERIFICATION
CUSTOMER TYPE	MANAGED	✓	✓	OPTIONAL
	FEDERATED	✓		OPTIONAL
	INDEPENDENT			✓

## For your users

The average person has 100 different sets of login credentials for accessing various mobile apps and web portals,\* and it's challenging to keep track of all of them. Our SSO solution, used by millions of HCPs today, to navigate thousands of websites, eliminates the need for your users to remember yet another username and password.

## For your team

The IQVIA HealthCare Authenticator SDK offers fast, straightforward integration, high-quality open-source code and the latest technology (Microsoft Azure, OpenID, SAML2). Benefits include:

### SOFTWARE

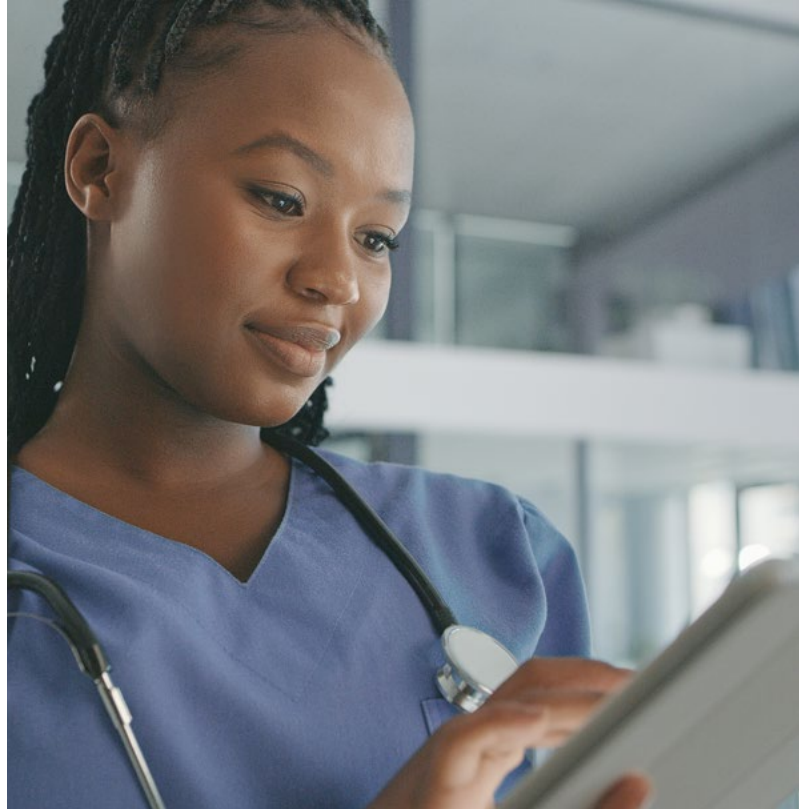

Partner with a trusted software provider to eliminate the need for resource-intensive build and maintenance of user sign-on, user authentication and identity verification systems. It is available for JavaScript and will soon be available for iOS, Android, WordPress and SFDC.

### EASY VISUAL CUSTOMIZATION OF THE USER EXPERIENCE

Benefit from pre-built layout options and easily customize images, colors, fonts and icons to match your brand's look and feel.

### INTEGRATION WITH ONEKEY DATA FOR IDENTITY VERIFICATION AND SSO

- 24M healthcare professionals
- 2.6M healthcare organizations
- 114 countries
- Over 300 specialties
- Daily updates

### SCALABLE PRICING

- Access to HealthCare Authenticator and annual maintenance for first application: \$5,000
- Access and annual maintenance for subsequent applications: \$3,500
- HealthCare Authenticator usage fees: \$0.25 to \$7.50 per identity verification (payable per package)
- Premium support (annual subscription; optional services): \$25,000
- Additional implementation services: pricing available on-demand
