

# IQVIA Trust NHS Dispensing Data

## A cost-effective solution for top-line analysis on the secondary care medicines market, with insights derived from the NHS Secondary Care Medicines Data (SCMD).

### WHAT IS TRUST NHS DISPENSING DATA?

Trust NHS Dispensing Data is a dataset solution that provides a topline view of the secondary care medicines market in England, utilising the NHS Secondary Care Medicines Data (SCMD) published monthly by the NHS Business Service Authority (BSA). Data is provided at a trust level, with products differentiated by molecule, strength, and formulation.

### WHAT ARE THE FEATURES?

Powered by IQVIA's expertise, data are available at minimal cost, with maximum simplicity and rapid usability.

#### Data are provided with:

- Milligrams molecule, VMP units, and estimated value (£) measures
- Human-readable product description fields
- Broad geographic and molecule grouping fields

#### The data provided gains additional value through:

- 1-day high-speed processing-to-delivery
- Cleaning and joining of data to IQVIA references

#### Purchasing requires minimal set up, with simple defining of market inclusion and delivered in:

- IQVIA Analysis Manager (IAM) online viewer of data, for human-based analysis
- Flat file (csv-format) delivery of data, for ingestion into customer databases

### WHY USE TRUST NHS DISPENSING DATA?

The insights provided by Trust NHS Dispensing Data are ideal for customers looking for analysis of product markets that require minimal product or hospital site detail, and are simple, stable, and broad secondary care markets.

Customers can use these insights for an introduction to new client secondary care markets such as for approximate market sizing, summary views of molecules and their approximate forms, and identifying large trusts.

### KEY FACTS

Covers acute, teaching, specialist, mental health, and community trusts in England

Molecule, form, and strength product level detail included

Delivered with approximately 6 weeks delay-after-period (DAP)

### RELATED OFFERINGS

For more data detail and analytical customisation:

- Hospital Pharmacy Audit (HPA)
  - detailed insights into how and where products are prescribed across UK hospital sites
- Account Level Hospital Profiler (ALHP)
  - insight-driven profiling, targeting and performance monitoring in the UK hospital sector
